🗎 Summary

I'm a **Senior software engineer** with more then **10 years** of experience and work in different projects as Helpdesk, Insurance for pets, Video stream for 3 countries in Europe and many projects with Third party integration.

I'm a professional that really like to **bring new technologies** to the project, care about **quality code**, and In the past 3 yeas I've been working with different *open source projects* such as Sonata Page Bundle, I was one of the most active maintainer for the last **major** release, Then I invite you to check out my github profile, So you can have a good overview how I handle Pull requests, issues and collaborate with OSS! BTW this resume was generate for one of my open source projects: myprofile

For the past years I've been working with **Symfony 3/4/5/6, PHP 7/8, Elastic search, Redis, Message queue** and so on, and recently I started to play with Tinygo for hobby project that involve hardware 🤓.

💼 Experience

Senior Software Developer — Power cloud

Since Sep 2023

On September firsrt I have started at power cloud as a Senior softwere developer located in the delivery team.

Senior Software Engineer — Legal One GmbH

jan 2023 - May 2023 (5 months)

LegalOne is the first company that I could work with distributed system, and There I've been working with different micro services, and the whole communication is via **RabbitMQ**, and most of them are in **Php8** and **Symfony 5**!

100% of the tasks was made using **Functional tests** to guarantee that **consumers** and **producers** were working as expected and we didn't miss any configuration.

Technical lead — Endava Berlin

Apr 2020 - Dez 2022 (2 yrs 9 mos)

In the last year I leaded a team with 3 developers and I was responsible to upgrade *php* and related packages for the new versions, and during this period I also helped different projects and squads to move forward with **Php8** and **Symfony 5/6**, releasing the next major version of sonata page bundle, with this many others projects was unblocked to support the last version.

I'm really thankful for had worked at Endava and I left the company with doors opened and I have really **good recommendations** from there.

Senior PHP Developer — Endava Berlin

I joined in Endava's team to developer from scrach the projects flimmit.at and fidelio, and I've made interesting parts of the project like a micro service to users, I've used many packages of sonata admin bundle and with it I started to contribute more with the community, and other features in the project like continue watching, save favourite assets/movies, work with ESI cache and so on.

- *Stack*: Symfony, api platform (API Rest), mysql, redis, esi cache, Varnish, sonata admin, sonata page, sonata blocks, docker, TDD, BDD, Functional Tests, and Gitlab CI.
